Your life. To go.

Power and speed. The new iBook comes with a 500-MHz PowerPC G3 processor, a 10GB hard drive expandable to 20GB, and support for up to 640MB of memory. It has a 12.1-inch TFT display with 1024-by-768-pixel resolution and an ATI RAGE Mobility 128 graphics accelerator that's made for gaming.

Endless possibilities. With FireWire, two USB, VGA video output, and AV ports, you can connect a DV camcorder, digital camera, MP3 player, or PDA. iBook brings your digital world together.
